EDUCATION

Bachelor's in Computer Application
Calicut University | 2022 - 2025

Full Stack Developer Intern
Bridgeon Solutions LLP, Kerala, India
Apr 2025 – Jan 2026

CERTIFICATIONS

One Million Prompters – Dubai
Dubai Future Foundation 2025

Python Fullstack Developer
Django • DRF • React

LANGUAGES

English (Fluent) • Malayalam (Fluent)

TECHNICAL SKILLS

- LLMs (Groq Llama 4 Vision, Llama 3.3 70B)
- Claude AI (Haiku, Vision API, Anthropic API)
- OpenAI GPT-4, Hugging Face Transformers
- RAG Pipelines & pgvector Embeddings
- Vector Search, Semantic Retrieval
- AI Vision (OCR, MRZ, Photo Grading)
- CV Parsing, NLP Classification
- Prompt Engineering & AI Evaluation
- Claude Code, AI-Assisted Dev, Vitest
- LangChain Concepts, AI Orchestration
- Python, JavaScript, TypeScript
- Django 5.x, DRF, FastAPI
- REST API Design, RBAC, Webhooks
- React 19, Next.js 16, Vite
- Framer Motion, Lenis Animations
- PostgreSQL (RLS, Multi-Tenant), Supabase, Redis
- Cloudinary, Cloudflare R2, DO Spaces
- AWS EC2/RDS, DigitalOcean, Railway, Vercel
- Docker, Docker Compose, Microservices
- GitHub Actions CI/CD, Git Workflows
- Nginx, Gunicorn, Certbot SSL, systemd
- JWT, OAuth2, Firebase Auth, RBAC
- Celery, Redis Queues, Async Processing
- ReportLab PDF, openpyxl Excel Generation
- Sentry Error Tracking, SWR Caching
- AML/KYC Compliance, Sanctions Screening
- Multi-Tenant SaaS, Row-Level Security
- Arabic RTL / Bilingual i18n

PROFILE

AI Full Stack Developer and Lead Engineer who designs, builds and deploys production AI products end to end, from architecture and database to frontend, AI integration and CI/CD. Sole engineer behind AXIS KYC, a live AML/KYC compliance SaaS serving 1,000+ screened profiles across multiple UAE compliance firms, with PostgreSQL RLS, four role-based portals, Claude Vision document OCR and automated sanctions/PEP screening. Experienced in vision AI, RAG pipelines and vector search, working with a disciplined AI-assisted workflow (Claude Code) backed by automated testing and real-world AI evaluation. Based in Dubai and immediately available.

EXPERIENCE

AI Full Stack Developer / Lead Engineer

AM AUDIT | ABDULLA AL MULLA AUDITING & ACCOUNTING 2026 – Present

Multi-Tenant AML/KYC Compliance SaaS | app2.axiskyc.ae

Sole engineer who designed, built, and deployed a multi-tenant AML/KYC compliance SaaS platform for the UAE market, used by compliance firms to screen individuals against international sanctions, PEP, and adverse media databases.

- Built a Django/DRF API with PostgreSQL Row-Level Security across 33 tables, three database roles for structural tenant isolation, and a 6-factor weighted risk scoring engine aligned to UAE Central Bank regulations
- Automated screening integrating Sanctions.io (OFAC, UN, EU, UK HMT), PEP databases, UAE Local Terrorist List, and AI-powered adverse media analysis
- Passport and Emirates ID OCR using Claude Vision API with forced tool-use, Tesseract fallback, and MRZ validation with 4-7 second document reading and 9-field automatic extraction
- Next.js 16 / React 19 TypeScript SaaS frontend with Arabic RTL support, dark/light theme, SWR caching, and four role-based portals: Organisation, Admin, Broker, and External Compliance Officer (multi-company dashboard with JWT tenant switching)
- Passed a 16-finding pre-launch security audit with 1,255 regression tests, in-memory JWT tokens, transaction atomicity, idempotency guards, and rate limiting on all paid API endpoints
- Training system with in-video AI quizzes, completion certificates with QR verification, AML audit document management, EDD workflow, and bilingual PDF certificate generation

Tech: Python, Django, PostgreSQL (RLS), Next.js 16, React 19, TypeScript, Tailwind, Celery, Redis, Claude AI, Tesseract, Docker, GitHub Actions

Impact: SaaS platform serving 1,000+ screened profiles across multiple UAE compliance firms.

AI Full Stack Developer

REFURBOPS | INDEPENDENT PRODUCT, DUBAI Nov 2026

AI-Powered Refurbished Electronics Operations Platform | refurbops.vercel.app

- AI photo grading with a vision model (human-in-the-loop, confidence-gated) and an AI Ops Assistant answering plain-English questions from pre-computed data, evaluated over repeated real runs
- Oversell-safe multi-marketplace sync with idempotent webhooks, repair/QC pipeline, smart IMEI intake (TAC + Luhn) and multi-currency costing (AED, INR, USD to EUR)
- Built with Claude Code via a gated plan, review and verify workflow; 150+ automated tests and GitHub Actions CI

Tech: Next.js 16, React 19, TypeScript, Claude API (vision), Vitest, GitHub Actions, Vercel

Full Stack AI Developer

PROPAI OS | ZERO ACCOUNTING, ABU DHABI May – Jun 2026

AI-Powered Property Management Platform

- Vision-AI maintenance: tenants snap a photo, Groq Llama 4 analyses the damage, sets priority and writes the ticket
- Smart Rent Pricing engine benchmarked on live Dubai market data with confidence scores, plus a RAG concierge chatbot on pgvector and Llama 3.3 70B
- Multi-tenant SaaS with four role-based portals, JWT auth across eight roles, Celery/Redis jobs and five Docker services

Tech: Django 5, React 19, Groq Llama 4, pgvector, Celery, Redis, Docker, Railway

Frontend Developer & AI Integration

SEEK & SYNC HR CONSULTANCY | ABU DHABI Feb – Apr 2026

Live HR Consultancy Platform | seek-and-sync.netlify.app

- Designed and shipped a live luxury-feel HR consultancy website serving real candidates and recruiters across Abu Dhabi
- AI CV parsing with Claude Haiku and Supabase embeddings for automatic vacancy matching, plus AI-written recruiter alerts

Tech: Next.js 14, TypeScript, Tailwind, Claude Haiku, Supabase, pgvector, Netlify

Full Stack Developer

HOROLOGIE | ENTERPRISE E-COMMERCE 2025

horologiee.vercel.app

- Full-stack e-commerce platform built from scratch with JWT, Google OAuth and Firebase MFA, plus Cloudinary media
- React Context state management and Django ORM aggregations powering a real-time analytics dashboard

Tech: Django REST Framework, React, JWT, Google OAuth, Firebase MFA, Cloudinary, PostgreSQL

Frontend Developer

ZERO ACCOUNTING | ABU DHABI Jun 2026

Bilingual Corporate Website | zeroaccounting.ae

- Bilingual English/Arabic website for an FTA-approved tax agency, RTL via react-i18next, branded SVG preloader
- 3D tilt cards, magnetic buttons, split-text reveals and scroll animations, optimised for mobile; Vercel with custom domain

Tech: React, Vite, Tailwind CSS, Framer Motion, Lenis, react-i18next, Vercel

KEY ACHIEVEMENTS

- Shipped five live platforms: AXIS KYC (compliance SaaS), RefurbOps (refurb operations), Seek & Sync (HR consultancy), Horologie (e-commerce), and the Zero Accounting corporate website
- Designed and deployed multi-container Docker systems with 5+ services, integrating Groq Llama 4 Vision, Llama 3.3 70B, and Claude AI into production-ready workflows
- Selected for the One Million Prompters Dubai 2025 programme by the Dubai Future Foundation
