EDUCATION

Bachelor's in Computer Application
Calicut University | 2022 - 2025

CERTIFICATIONS

One Million Prompters – Dubai
Dubai Future Foundation 2025

Python Fullstack Developer
Django • DRF • React

LANGUAGES

English (Fluent) • Malayalam (Fluent)

TECHNICAL SKILLS

- LLMs (Groq Llama 4 Vision, Llama 3.3 70B)
- Claude AI (Haiku, Vision API, Anthropic API)
- OpenAI GPT-4, Hugging Face Transformers
- RAG Pipelines & pgvector Embeddings
- Vector Search, Semantic Retrieval
- AI Vision (Document OCR, Tesseract, MRZ)
- CV Parsing, NLP Classification
- Prompt Engineering & AI Evaluation
- LangChain Concepts, AI Orchestration
- Python, JavaScript, TypeScript
- Django 5.x, DRF, FastAPI
- REST API Design, RBAC, Webhooks
- React 19, Next.js 16 App Router
- PostgreSQL (RLS, Multi-Tenant), Supabase, Redis
- Cloudinary, Cloudflare R2, DO Spaces
- AWS EC2/RDS, DigitalOcean, Railway, Vercel
- Docker, Docker Compose, Microservices
- GitHub Actions CI/CD, Git Workflows
- Nginx, Gunicorn, Certbot SSL, systemd
- JWT, OAuth2, Firebase Auth, RBAC
- Celery, Redis Queues, Async Processing
- ReportLab PDF, openpyxl Excel Generation
- Sentry Error Tracking, SWR Caching
- AML/KYC Compliance, Sanctions Screening
- Multi-Tenant SaaS, Row-Level Security
- Arabic RTL / Bilingual i18n

PROFILE

AI Full Stack Developer and Lead Engineer with hands-on experience designing, building, and deploying production-ready multi-tenant SaaS platforms for the UAE market. Sole engineer behind AXIS KYC — a live AML/KYC compliance platform serving 1,000+ screened profiles across multiple UAE compliance firms, featuring PostgreSQL RLS, four role-based portals, AI-powered document OCR with Claude Vision API, and automated sanctions/PEP screening. Specializing in integrating LLMs into real-world products through RAG pipelines, vector embeddings, and vision-based automation. Based in Dubai and immediately available.

EXPERIENCE

AI Full Stack Developer / Lead Engineer

AM AUDIT | ABDULLA AL MULLA AUDITING & ACCOUNTING 2026 – Present

Multi-Tenant AML/KYC Compliance SaaS | app2.axiskyc.ae

Sole engineer who designed, built, and deployed a multi-tenant AML/KYC compliance SaaS platform for the UAE market, used by compliance firms to screen individuals against international sanctions, PEP, and adverse media databases.

- Built a Django/DRF API with PostgreSQL Row-Level Security across 33 tables, three database roles for structural tenant isolation, and a 6-factor weighted risk scoring engine aligned to UAE Central Bank regulations
- Automated screening integrating Sanctions.io (OFAC, UN, EU, UK HMT), PEP databases, UAE Local Terrorist List, and AI-powered adverse media analysis
- Passport and Emirates ID OCR using Claude Vision API with forced tool-use, Tesseract fallback, and MRZ validation with 4-7 second document reading and 9-field automatic extraction
- Next.js 16 / React 19 TypeScript SaaS frontend with Arabic RTL support, dark/light theme, SWR caching, and four role-based portals: Organisation, Admin, Broker, and External Compliance Officer (multi-company dashboard with JWT tenant switching)
- Passed a 16-finding pre-launch security audit with 1,255 regression tests, in-memory JWT tokens, transaction atomicity, idempotency guards, and rate limiting on all paid API endpoints
- Training system with in-video AI quizzes, completion certificates with QR verification, AML audit document management, EDD workflow, and bilingual PDF certificate generation

Tech: Python, Django, PostgreSQL (RLS), Next.js 16, React 19, TypeScript, Tailwind, Celery, Redis, Claude AI, Tesseract, Docker, GitHub Actions

Impact: SaaS platform serving 1,000+ screened profiles across multiple UAE compliance firms.

Full Stack AI Developer

PROPAI OS | ZERO ACCOUNTING, DUBAI May – Jun 2026

AI-Powered Property Management | propai-os.up.railway.app

- Built a vision-AI maintenance system where tenants snap a photo, Groq Llama 4 analyses the damage, sets priority, and writes the ticket automatically
- Designed a Smart Rent Pricing engine benchmarking against live Dubai market data with confidence scores, powered by Groq Llama 3.3 70B
- Built a RAG-powered concierge chatbot using pgvector and Llama 3.3 for instant tenant and admin Q&A about leases, payments, and building rules
- Architected multi-tenant SaaS with four role-based portals, JWT auth across eight roles, Celery/Redis async jobs, and Docker Compose orchestrating five services

Tech: Django 5, React 19, Groq Llama 4, pgvector, Celery, Redis, Docker, Railway

Frontend Developer & AI Integration

SEEK & SYNC HR CONSULTANCY | ABU DHABI Feb – Apr 2026

Live HR Consultancy Platform | seek-and-sync.netlify.app

- Designed and shipped a live luxury-feel HR consultancy website using Next.js 14 and TypeScript, now serving real candidates and recruiters across Abu Dhabi
- Built an AI CV parsing pipeline with Claude Haiku: candidates upload a CV, Claude extracts the data, and embeddings get stored in Supabase for automatic vacancy matching
- Set up automated recruiter alerts through Resend with AI-written summaries, real-time unread badges, and WhatsApp button for instant candidate contact

Tech: Next.js 14, TypeScript, Tailwind, Claude Haiku, Supabase, pgvector, Netlify

Full Stack Developer

HOROLOGIE | ENTERPRISE E-COMMERCE 2025

horologiee.vercel.app

- Built a full-stack e-commerce platform from scratch with multi-factor authentication using JWT, Google OAuth, and Firebase MFA, plus Cloudinary media delivery
- Used React Context API for clean global state management and optimised the Django backend with ORM aggregations to power the real-time analytics dashboard

Tech: Django REST Framework, React, JWT, Google OAuth, Firebase MFA, Cloudinary, PostgreSQL

Full Stack Developer Intern

Apr 2025 – Jan 2026

BRIDGEON SOLUTIONS LLP, KERALA, INDIA

- Built a production-ready e-commerce backend in Django REST Framework with JWT, Google OAuth, and Firebase phone authentication
- Deployed on AWS EC2 with Nginx and Gunicorn, set up SSL via Certbot, and designed a hybrid cloud stack with Supabase, Cloudinary, and Stripe
- Automated zero-downtime deployments using a custom GitHub Actions CI/CD pipeline with webhook-based release notifications

Tech: Django, DRF, React.js, AWS EC2, Nginx, GitHub Actions, Supabase, Cloudinary, Stripe

KEY ACHIEVEMENTS

- Shipped three live production platforms for the UAE market: AXIS KYC (compliance), PropAI OS (property management), and Seek & Sync (HR consultancy)
- Designed and deployed multi-container Docker systems with 5+ services, integrating Groq Llama 4 Vision, Llama 3.3 70B, and Claude AI into live production workflows
- Selected for the One Million Prompters Dubai 2025 programme by the Dubai Future Foundation
